

I believe that regardless of whether an individuals telephone number is listed or unlisted, we are entitled to a secure, peaceful uninterrupted, private living environment. We are too often interrupted during our only private family time (most often dinner hour or when we are getting our children ready for bed ) to answer the phone for many times a pushy, won't take no for an answer telemarketer. Please establish strict guidelines so "we the people" receive peaceful environment we are entitled to.

Thanks you for your consideration with this matter.
